# Revenge of the Geeks

Reality format

**In a few years from now -**

**Who will save the planet from global warming?**

**Who will invent a cure for cancer?**

**And who will win the 30th season of "The Apprentice"??...**

**A brand new and exciting studio reality game show in-search for the nation's next genius kid.**

*Revenge of the Geeks* places 12 of the country's brightest children in a series of fascinating challenges.

During the course of the season we follow these children, brighter than most adults, perform extraordinary tasks, such as mastering a language in a matter of hours or defying renown experts in their own field, while at the same time acting like only kids do. *Revenge of the Geeks* is prime time TV for the entire family - witty and entertaining, funny and moving.

After being selected from over a thousand candidates 6 boys and 6 girls compete in various fields, both practical, intellectual and emotional, for a chance to win a full scholarship award.

Each episode is comprised of different stages, among them:

**The Social Tryout** – groups are divided and alliances are formed, placing the kids in delicate relationships and interactions. Will their individualist nature and young age enable them to cope with the intrigues?

**The Main Challenge** – A variety of exciting and original challenges testing the candidates' intellect, wit and inventiveness, such as "The Nasa Experiment", in which the contestants engineer and maneuver a "spaceship" landing in the country's prestigious scientific research center.

**The Expert Test** - The children are tasked in a one-on-one challenge with a celebrity expert in his own field - a mathematical genius, a linguist, an artist and more.

Beyond the unbelievable performances of these young prodigies, it is often their contrasting testimonials, revealing the child in them, which renders the most heartfelt, funny and dramatic moments.

Celebrating the importance of our children's education, combined with a thrilling line up and extraordinary competitors, this is must see TV.

## Highlights:

- The thrill and emotions of reality within a studio show
